Taiwan High Court Kaohsiung Branch Clears ASE and the Company's Employees from Charges Related to the Violation of the Waste Disposal Act

Taipei, Taiwan, September 29, 2015 – Advanced Semiconductor Engineering, Inc. (TAIEX: 2311, NYSE: ASX) announced today that the Taiwan High Court Kaohsiung Branch has cleared the company and its five employees of all charges related to the Violation of the Waste Disposal Act.

In the press release issued by the Taiwan High Court Kaohsiung branch today, the court has noted that on October 1, 2013 1000hrs, when an abnormal overflow of hydrochloric acid occurred, ASE had tried to neutralize the discharge by increasing the amount of caustic added to the effluent. By 2000hrs of the same day, the pH value of the effluent discharge had gradually returned to normalcy. The court was of the opinion that the October 1, 2013 discharge of wastewater over regulatory effluent limits was not a deliberate act but was a result of the lack of a well-equipped internal procedure to handle contingencies such as the hydrochloric acid overflow.

Since the incident, ASE has taken this opportunity to further strengthen its internal infrastructures and policies in the management of environmental issues including wastewater discharge processes. In April 2015, ASE began operating Taiwan's largest state of the art wastewater processing and recycling facility at the Nantze Export Processing Zone in Kaohsiung. In its first phase, the facility is capable of processing 20,000 tons of wastewater per day and recycling 10,000 tons per day. The second phase is expected to be completed by 2017 whereby it aims to process 40,000 tons of wastewater per day and recycle almost 20,000 tons per day.

ASE is sincerely grateful that the company and its employees have been vindicated from all charges. The company continues to commit to corporate sustainability and focus its efforts in building a socially responsible entity in the countries and communities it operates in.

Safe Harbor Notice:

This press release contains "forward-looking statements" within the meaning of Section 27A of the United States Securities Act of 1933, as amended, and Section 21E of the United States Securities Exchange Act of 1934, as amended, including statements regarding our future results of operations and business prospects. Although these forward-looking statements, which may include statements regarding our future results of operations, financial condition or business prospects, are based on our own information and information from other sources we believe to be reliable, you should not place undue reliance on these forward-looking statements, which apply only as of the date of this press release. The words "anticipate," "believe," "estimate," "expect," "intend," "plan" and similar expressions, as they relate to us, are intended to identify these forward-looking statements in this press release. Our actual results of operations, financial condition or business prospects may differ materially from those expressed or implied in these forward-looking statements for a variety of reasons, including risks associated with cyclical and market conditions in the semiconductor or electronic industry; changes in our regulatory environment, including our ability to comply with new or stricter environmental regulations and to resolve environmental liabilities; demand for the outsourced semiconductor packaging, testing and electronic manufacturing services we offer and for such outsourced services generally; the highly competitive semiconductor or manufacturing industry we are involved in; our ability to introduce new technologies in order to remain competitive; international business activities; our business strategy; our future expansion plans and capital expenditures; the strained relationship between the Republic of China and the People's Republic of China; general economic and political conditions; the recent global economic crisis; possible disruptions in commercial activities caused by natural or human-induced disasters; fluctuations in foreign currency exchange rates; and other factors. For a discussion of these risks and other factors, please see the documents we file from time to time with the Securities and Exchange Commission, including our 2014 Annual Report on Form 20-F filed on March 18, 2015.
